Summary

Status of my progress in various programming languages.

Python -> 7/10

Exploring the Dynamic applications of python and learning to write a Script for a tool using python. Also making Plugins using Python for Userbots.

C++ -> 6/10

Advancing in DSA, already learnt about the STL. Also starting CP using C++.

JS -> 5/10

As of now, I know JS to the level, that I can easily Import it's useful modules in any website. Trying to dive deep into JS, so that I will be able to use it for Back-End development too.

HTML5 -> 9/10

Can't say that I had mastered it, because something always remains to be mastered. Exploring the advanced types of Inputs and various advanced Tags offered by HTML5.

CSS3 -> 8/10

Can easily create reactive websites using css. Trying to learn more simpler ways to simplify the code required for reactive blocks. Trying to learn Advanced concepts of CSS, like mouse movement animation, etc.

You can find my works on GitHub (@MasterK0927), currently a major portion of my work is private (due to obvious reasons), but already started making a few of them Public.

Experience

Lead Developer

Techentron

Jul 2021 - Present (1 year 10 months)

Lead Developer and Founder Techentron
